

Outline's Asian appointment

Italy / South-East Asia - Italian pro audio manufacturer Outline, which recently won a PLASA Award for Innovation for its COMPASS system, has appointed Discovery Lights & Sound Pte Ltd as its sole distributor for Singapore and Malaysia.

Outline - COM.P.A.S.S.

The first robotic speaker enclosure. It can be used alone or combined with other elements to form a vertical line array. Thanks to a sophisticated mechanism moved by five motors, the system can adjust vertical and horizontal directivity simultaneously from 60-150 on the horizontal plane and from 0-15 on the vertical plane which can be operated via remote software. A further on-board adjustment system -also remotely controllable - allows adjustment of the splay angle between the elements when COM.RA.S.S. is used to form a Vertical Line Array. The judges marked it out for its high level of innovation and that fact that it had delivered a solution long overdue.

Outline

Aside from its Award-winning COMPASS system (see Award Winners), Outline introduced the HARD45, a low profile wedge monitor (4x5" and 1x1"). self-powered with reflective waveguide giving 60° by 40° from a very shallow box.
