

OUTLINE AT 5.1 IN THE TOWER OF LONDON

Sigma Audio Visual recently supplied a full DTS 5.1 sound system for a two-week production at the Tower Of London (U.K.). The system included five Outline Micra II SP loudspeakers and one Outline Global Sub, all self-

There's 5.1 contained in those tower walls.

powered and controlled via a Millennium DTS digital signal processor. Sigma AV was commissioned to provide the system and support because they were the only company in the region to offer a DTS solution for the specific program material of the production. Event Producer Tony Platt expressed satisfaction with the quality of the system.
