

### **Outline H.A.R.D. 45 SP Stage Monitor**

[www.outline.it](http://www.outline.it)

The Outline H.A.R.D. 45 SP stage monitor is the most compact in die company's **H.A.R.D.** line, but with the same design parameters. Peak sound pressure level is rated at 129 dB (1-watt/1-meter). It includes built-in PWM power amplifiers supplying two-way (low and high) **power** to the **transducers**.

The H.A.R.D is loaded with four 5-inch mid-woofers (the same as those mounted in Micra II enclosures) and n compression driver with a 1-inch throat loaded by the same S.P.R.W.G. (Single Parabolic Reflective Wave Guide) used for the other models in the range.
