

Outline SubTech 218 SP subwoofer

www.outline.it

Based on the existing TopSub design, the SubTech 218 SP is a compact, self-powered dual 18-inch subwoofer which reaches down to 26 Hz in a 0.45 cubic meter volume, 80 kg package. Featuring extra-large reflex ports, continuous SPL is quoted as 137 dB at 1 meter (143 peak); via dual, integral PWM power amplifiers (one for each loudspeaker). Both woofers incorporate 100mm diameter coils and a powerful ferrite magnet, and the rear connector panel is recessed to minimize the risk of water entering in the event of rain.

The unit can be flown via six integral flying points for the proprietary 'Fast Hanger' system. An optional trolley is also available, along with a non-amplified version.
