

OUTLINE: MINI-COMPASS has manually adjusted horizontal waveguides that are set from the VIP software to be adjusted asymmetrically from 60-150° in 15° steps in relation to the axis. In vertical line arrays it's in 0.5° increments. DVS Series are the DVS 8 [8"+1"], DVS12 [12"+3"] and DVS 15 mid bass [15"]. DVS 12 and 15 cabinets can be either passive or bi-amped partnered with the Outline Genius 24 controller. The speakers (including subs) use all neodymium components. The SUBTECH 218 has a LF range of 26Hz and a continuous SPL of 137dB @ 1 m. Genius M 412 is the only loudspeaker management system with 4 inputs and 12 outputs, giving enough ins and cuts for any occasion. Outline is also the only loudspeaker manufacturer to have the first internet controllable loudspeakers called EQUIP [equalisation using internet protocol]. Its self powered DSP enabled loudspeakers will have an option of a wireless module, allowing engineers to adjust gain, Xover, EQ and filters via a wireless enabled PC.
