

The 300-seat Talan Honar theatre is a historic building located in the heart of Tehran, the capital city of Iran. The theatre is mainly used for multipurpose applications, such as theatre, drama, live music and - being equipped with 5.1 Dolby equipment and a 35mm, cinema projector. The theatre is owned by the Municipality of Tehran and its refurbishment was recently completed by one of Iran's largest companies (Sazeman Farhangi Honary Shardari), which renovated the hall, changing the interior decoration, seats, screen, acoustic treatment and wall covering, as well as the sound reinforcement system and lighting fixtures.

Sound equipment was provided by Outline, and includes a three-channel main system made up of Integra A, a 2-way 400W AES loudspeaker system for bi-amping, and a pair of Minisub Plus subwoofers, fitted with a single 18" woofer. The system is tri-amped, through a pair of Genius 26 DSP loudspeaker management processors, while the surround speakers are eight Outline Omnia Plus full-range 2-way systems. All the loudspeakers are powered by Outline PWM amplifiers, which range from the 4-channel D4-2K for the surround cabinets to the 2-channel T 4.5 for the main and sub systems. The Talar Honar Theatre is the second theatre

fitted with Outline equipment in the last twelve months in Tehran, and others are due to be completed shortly.
