

## Outline issues copyright declaration

Italy - Italian pro audio manufacturer Outline has issued a statement regarding its intellectual property (particularly the design of its Butterfly line array system) and the agreement reached with Stamer Musikanlagen GmbH and Music & Sales Professional Equipment GmbH (the parent company of German manufacturer HK Audio), in which Outline says it has agreed to 'tolerate' the design of HK Audio's COHEDRA line array system.

The statement also warns other manufacturers "to refrain from commercialising line-array loudspeakers which infringe the above-mentioned intellectual property rights". The company goes on to say it will instigate legal proceedings "in any case of infringement of its intellectual property rights."
