

## Outline's curtain call

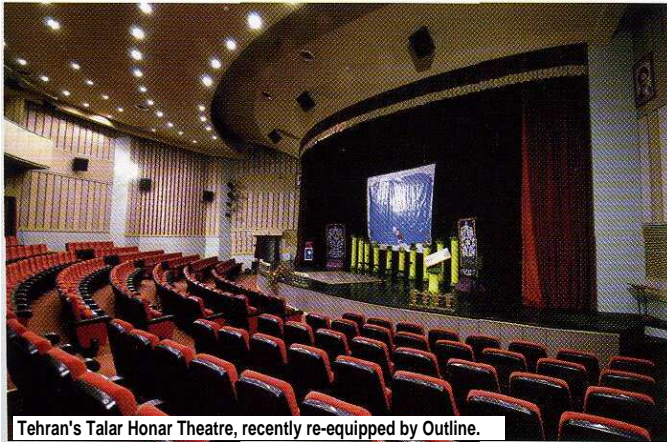

**IRAN:** Located in the heart of Tehran, the 300-seat Talar Honar theatre is mainly used for stage productions, drama and live music but is also equipped with a 5.1 cinema Dolby system and a 35 mm cinema projector for movie showings. The theatre is owned by the Municipality of Tehran and was recently refurbished by Sazeman Farhangi Honary Shardari, including renewing the hall's decoration,

seats, cinema screen, acoustics and the wall covering, as well as replacing the sound reinforcement system and lighting. The project, managed by Masood Roosraei, was begun in August 2005 and completed during February.

The sound equipment was provided by Outline, and includes a three-channel Integra A main system with a pair of 18-inch Minisub Plus subwoofers, and

eight full-range two-way Outline Omnia Plus loudspeakers for the surrounds. All the speakers are driven by Outline power amplifiers - a four-channel D4-2K for the surround cabinets and a dual-channel T 4.5 for the main and sub system - and controlled by a pair of Genuis 2GDSP loudspeaker management processors.

The Talar Honar theatre is the second to be equipped with an Outline system in Tehran, with other installations scheduled to be completed shortly. The project was undertaken by local distributor Hashemi Trading, which has specified Outline for all its recent projects. [www.outline.it](http://www.outline.it)
